

SRX “X-Tra Seal” Series Vessels

The Strainrite “X-Tra Seal” vessel was developed by our in-house engineering team for the expressed purpose of eliminating vessel-to-bag bypass, a critical element when high efficiency filtration is required. Strainrite’s proprietary “Five Points of Seal” design has proven to be a major advance in filter vessel technology, performing admirably where the competition hasn’t.

Featuring an effective seal on all three crucial planes of the bag, (the top, side, and bottom) as well as two additional O-rings that eliminate the likelihood of bypass along the vessel’s interior wall, the “X-Tra Seal” is truly your best choice for highly efficient bag filtration performance.

The most efficient filter vessel deserves the most efficient filter bag! Using Strainrite’s acclaimed Hi-Pro Micro Series F.D.A. Compliant filter bags ensures the purity of your end product.

“X-Tra Seal” vessels are widely used in applications where reliability, cleanliness, and efficiency are key, such as the Pharmaceutical, and Food and Beverage Industries.
