

Flavor Concentrate Bag

Specialty Bags

▪ Food and Beverage Industry

▪ Beer

New from the Strainrite Companies, [The Flavor Concentrate Bag \(FCB\)](#) is a material handling product designed to reduce labor and material handling costs associated with Breweries “Dry Hopping” processes.

Beer isn’t beer without hops. Originally used as a preserving agent, hops are used for bittering, adding flavor or enhancing the aroma of hops are used for bittering, adding flavor or enhancing the aroma of beer. Hops can be added at different stages of the brewing process, and for different intervals.

Again, Strainrite [Flavor Concentrate Bags](#), nylon monofilament mesh filter bags catch boiling and finishing hops that are introduced during the brewing process. Also, Flavor Concentrate Bags bags reduce labor and material handling costs associated with dry hopping processes.

[Flavor Concentrate Bags](#) come in three different sizes. [FCB1](#) holds up to 1 pound of dry pellets (454 gram). [FCB5](#) holds up to 5 pounds of dry pellets (2.3 kilos). [FCB25](#) holds up to 25 pounds of dry pellets (11.3 kilos).

Features & Benefits

Flavor Concentrate Bags

- Reduce Maintenance Costs
